

CORRECTIONS & CLARIFYING INSTRUCTIONS FOR FORM 1428 PRINTED AND POSTED PRIOR TO JANUARY 4, 2006.

The previous Certified Appliance Recycler (CAR) Application, Form 1428, contained some incorrect information. DTSC revised the Form 1428 and posted it to the internet on January 3, 2006. If using the previous version please refer to this supplement when completing Form 1428.

CORRECTIONS:

The opening statement incorrectly states: "If you transport, deliver, or sell discarded major appliances to a scrap recycling facility, after January 1, 2006 you will need to provide evidence that you are a certified appliance recycler (CAR)" and "As of January 1, 2006 scrap recycling facilities will be prohibited from accepting a discarded major appliance from any person who is not a CAR." However, these statements are incorrect, you do not need to be a CAR if you just transport, deliver, or sell major appliances to a scrap recycling facility. Pursuant to Health and Safety Code (HSC) section 25211.2(b), any person who is not a CAR may transport, deliver, or sell discarded major appliances that have not been, baled, shredded, sawed or sheared apart, or otherwise processed to a scrap recycling facility if the scrap recycling facility is a CAR. Additionally, any person who is not a CAR may transport, deliver, or sell discarded major appliances that have been, baled, shredded, sawed or sheared apart, if that person provides the scrap facility a completed Form 1430 certifying that a CAR did remove all of the material(s) that require special handling from the appliances. DTSC is revising Form 1428 to state: *If you remove 'materials that require special handling' from a major appliance, after January 1, 2006 you will need to provide evidence that you are a certified appliance recycler, pursuant to Health and Safety Code 25211 (AB 2277, 2004).* Therefore, please complete Form 1428 only if you will remove 'materials that require special handling' from appliances after January 01, 2006.

Question 3, instructs individuals to call 1-800-618-6942 to obtain an EPA ID number. This is incorrect. DTSC no longer issues EPA ID numbers by phone. To obtain an EPA ID number, please complete DTSC Form 1358 and follow the instructions for submitting the form via mail.

When mailing your CAR application, please include Attention: "Universal Waste Section."

CLARIFICATIONS:

The facility address is not required by the statute, but DTSC requests that you provide the facility's address on the application.

Questions 4 & 5 ask some the applicants to submit documents to DTSC. If you are not required to submit the documents, please circle CORRECT in the second parts of questions 4 & 5.

For question 8, please describe in detail how you remove and manage all of the materials that require special handling or (see fact sheet) in the appliances you handle. Please include in your description: 1) all equipment used, 2) how you consolidate, store, and get rid of the materials that require special handling, and 3) any relevant specialized training that you or your personnel have received.

For additional information regarding the law, please refer to DTSC's Fact Sheet available on the internet at the URL below, or e-mail DTSC at sscott@dtsc.ca.gov.
